KL78 - The Road Ven
the Kumho 4x4 range
cross functional, with
d capability.

The KL 78's tread compound stays flexible as temperatures drop. This, in combination with the aggressive groove and sipe pattern, gives the tyre excellent all-season and all-surface traction - even in snow. Its rugged tread pattern has obvious off-road advantages, and includes tie bars to improve on-road stability and carefully engineered block sequences to reduce tread noise.

SPECIALIST FITMENTS: ECSTA KR KL27 - Kumho's 305/25R22 size tyre was the world's first ultra-large UHP cover and extends the boundaries of this increasingly popular market sector, but it is just one, albeit conspicuous, part of Kumho's latest ECSTA KR KL27 range for top-of-the-range SUVs which includes most popular fitments, particularly in the 18" to 22" rim sizes. The KR has been developed to take leadership in the UHP market and spearheads a growing line-up of top-class, technology-driven Kumho products for SUVs. Its key features include stability at high speed, excellent traction, durability and powerful braking performance.

ANOTHER NEW ARRIVAL - MPT KL61 - Another recent introduction to Kumho's Road Venture MPT KL61 for on-road use. Available in sizes up to 18", this street terrain tyre will deliver tremendous all-season traction, low noise and extended mileage performance.

Infinity®

The Infinite 4x4 Solution

Infinity tyres continue to offer excellent value and good quality tyres across the range.

The Infinity 4x4 tyre - the INF 200 - is available in the United Kingdom from Bond International. Bond are the exclusive Infinity tyre distributor for the whole of the UK.

The INF 200 is available in 18 sizes and offers a rugged and attractive off-road pattern.

The tyre also offers good grip for excellent handling across all terrain types: Tarmac, Sand, Gravel, Mud and Snow. The INF 200 therefore has excellent on and off road capability.
